

What d'you think? We want to know!

The Quality Crew

The Quality Crew is a team of young leaders from Changing Young Lives, who are trained to check the quality of local services, and work alongside adults to improve existing services and shape new services.

What we'll be doing

We've been asked to find out about children and young people's experience of emotional health and wellbeing services across Sandwell. We'll be working with children and young people aged 10-25. The majority of these young people will have experienced services, but we also want to ask young people who haven't what they might want should they need help.

If you have used an emotional health service such as the Child and Adolescent Mental Health Service (CAMHS), the Shield Service, the Eating Disorders or Early Intervention Service, or a similar service and you have ideas for how these services can get better, we want to hear from you!

Keeping it private!

The Quality Crew are trained in confidentiality and safeguarding and will explain the work we are doing. We will make sure you are happy to take part, and anything you tell us will remain anonymous.
